

## New Data Show that UZEDY® Initiation in Hospitalized Patients is Associated with Faster Discharge and an Overall Clinician Preference Compared to Invega Sustenna®

UZEDY® was associated with a 2.89-day shorter length of hospital stay compared with Invega Sustenna® (paliperidone palmitate)

This translates to estimated direct cost savings of \$3200 per hospitalization

More Healthcare Practitioners (HCPs) favored UZEDY® over Invega Sustenna® for ease of administration, initiation, dosing characteristics and subcutaneous injection features

The new data were showcased in one of ten schizophrenia-related posters presented by Medincell's partner, Teva, at the 2025 Psych Congress, held from September 17 to 21 in San Diego, California

UZEDY® (1-month and 2-month subcutaneous risperidone for treatment of schizophrenia), is the first product based on Medincell's long-acting injection technology that reached commercial stage. UZEDY was approved in the U.S. for the treatment of schizophrenia in adults in 2023.

Medincell's partner Teva led the clinical development and regulatory process and is responsible for commercialization. Medincell is entitled to receive royalties on net sales, along with development and commercial milestone payments.

### Extract from Teva's press release - September 20, 2025

In a retrospective observational cohort study that included HCPs who prescribed UZEDY or Invega Sustenna® (paliperidone palmitate) for patients with schizophrenia during hospitalization, found that the initiation of UZEDY (n = 137) was associated with shorter hospital stays compared to Invega Sustenna® (n = 94).<sup>1</sup> UZEDY was associated with a 2.89-day shorter LOS compared with Invega Sustenna® (12.57 [SD:10.03] vs 15.46 days [10.15], P=0.033), which translates to estimated direct cost savings of \$3,200 per hospitalization.<sup>1</sup> UZEDY was favored over Invega Sustenna® for ease of administration (45% vs 34%), initiation (47% vs 33%), dosing characteristics (40% vs 38%), and subcutaneous injection features (40% vs 33%). Overall, 45% preferred UZEDY, while 38% preferred Invega Sustenna®.<sup>1</sup>

Additionally, a real-world qualitative study of 56 healthcare professionals (20 physicians, 23 nurse practitioners/physician assistants [NP/PAs], 13 registered nurses [RNs]) show high levels of satisfaction with UZEDY.<sup>1</sup> Additional findings include:

- **Satisfaction:** For physicians, the most common areas of satisfaction were familiarity with UZEDY (87%) and subcutaneous injection (67%). For NP/PAs, they were effectiveness (42%), no loading dose (26%), and tolerability (26%).<sup>1</sup>
- **Initiation regimen:** Across HCP types, attributes of UZEDY most reported as slightly/significantly better when compared with other LAIs included lack of required loading dose (89%) and subcutaneous administration (86%).<sup>1</sup>
- **Plasma concentration:** UZEDY was more often reported as slightly/significantly better compared to other LAI options by NP/PAs (87%) and physicians (79%) than by RNs (69%) when asked about plasma concentrations.<sup>1</sup>

No comparisons can be made regarding efficacy, safety, or any other clinical outcomes as this was not studied.

## About Medincell

---

Medincell is a clinical- and commercial-stage biopharmaceutical licensing company developing long-acting injectable treatments across multiple therapeutic areas. Our innovative treatments are designed to ensure adherence to medical prescriptions, enhance the effectiveness and accessibility of medicines, and reduce their environmental impact.

These treatments combine active pharmaceutical ingredients with our proprietary BEPO® technology, which enables controlled drug delivery at therapeutic levels for several days, weeks, or months following a subcutaneous or local injection of a small, fully bioresorbable deposit.

The first treatment based on BEPO® technology was approved for schizophrenia by the FDA in April 2023 and is now marketed in the United States by Teva under the name UZEDY® (BEPO® technology is licensed to Teva under the name SteadyTeq™).

Our investigational pipeline includes numerous innovative therapeutic candidates in various stages of development, from formulation to Phase 3 clinical trials. We collaborate with leading pharmaceutical companies and foundations to advance global health through new treatment options.

Headquartered in Montpellier, France, Medincell employs over 140 people representing more than 25 nationalities.

This press release may contain forward-looking statements, particularly concerning the progress of the Company's clinical trials. Although the Company considers that its forecasts are based on reasonable assumptions, any statements other than statements of historical fact that may be contained in this press release relating to future events are subject to change without notice, to factors beyond the Company's control and to the Company's financial capabilities.

These statements may include, but are not limited to, any statements beginning with, followed by or including words or expressions such as "objective", "believe", "expect", "aim", "intend", "may", "anticipate", "estimate", "plan", "project", "will", "may", "probably", "should", "could" and other words or expressions of similar meaning or used in the negative. Forward-looking statements are subject to inherent risks and uncertainties beyond the Company's control which may cause actual results, performance or achievements of the Company to differ materially from those anticipated or implied by such statements.

A list and description of such risks, hazards and uncertainties can be found in the documents filed by the Company with the Autorité des Marchés Financiers (AMF) pursuant to its regulatory obligations, including in the Company's document de base, registered with the AMF on September 4, 2018 under number I. 18-062, as well as in documents and reports to be published subsequently by the Company. Furthermore, these forward-looking statements only apply as of the date of this press release. Readers are cautioned not to place undue reliance on these forward-looking statements. Except as required by law, the Company undertakes no obligation to publicly update these forward-looking statements, nor to update the reasons why actual results may differ materially from those anticipated in the forward-looking statements, even if new information becomes available. The Company's updating of one or more forward-looking statements does not imply that it will or will not update these or any other forward-looking statements.

This press release is published for information purposes only. The information contained herein does not constitute an offer to sell or a solicitation of an offer to buy or subscribe for securities of the Company in any jurisdiction whatsoever, particularly in France. Similarly, this press release does not constitute investment advice and should not be treated as such. It is not intended to address the investment objectives, financial situation or specific needs of any particular recipient. It should not be relied upon as a substitute for the exercise of your own judgement. All opinions expressed in this document are subject to change without notice. The distribution of this press release may be restricted by law in certain jurisdictions. Persons into whose possession this press release comes are required to inform themselves about and to observe any such restrictions.
